

New Site update - 03-24-09

Last Updated Tuesday, 24 March 2009

I have programmed a new event registration for the site. The old one required way too much human interaction creating 'sessions' for event registrations to be collected. This new feature will automatically generate a registration form for each event. This new form will render the old 'manual registration entry tool' for leaders irrelevant until it can be re-purposed to work with the new registration. I am confident that this new tool will make it much more seamless going forward. Also since I hand programmed it myself it will allow for many new feature add ons down the road.

Also a setting was added to user profiles to set them as Inactive members of the pack. They will still be able to log on but will not be considered part of the active pack for pack lists and other features.
